Diagram illustrating a sequence of 8 vertical bars, followed by a double bar, then a sequence of 4 vertical bars, followed by a double bar and a double-headed arrow.

[illegible]

--	--	--	--

The diagram illustrates a sequence of operations on a memory stack. The stack grows downwards from higher addresses at the top to lower addresses at the bottom. The initial state shows a stack with 10 cells, each containing a value. An arrow points to the top cell, indicating a push operation. The next state shows the stack with 11 cells, with the new value at the top. This is followed by a series of push and pop operations, indicated by arrows and the changing number of cells in the stack. The final state shows the stack with 10 cells, with the original values restored.
